SUMMARY

Cybersecurity student and SOC Analyst aspirant with hands-on experience building a live web vulnerability scanner, completing a recognized internship with Gurugram Police Cyber Cell, and currently interning at Marengo Asia Hospital. Skilled in threat detection, vulnerability assessment, Python-based security tool development, and incident analysis. Received official appreciation from the Assistant Commissioner of Police, Cyber Crime, Gurugram. Targeting SOC Analyst and cybersecurity operations roles.

TECHNICAL SKILLS

SOC & Threat Detection: Log Analysis, Threat Monitoring, Incident Response, IOC Identification, SIEM Concepts

Offensive Security: Penetration Testing, Vulnerability Assessment, Web App Security, OWASP Top 10, DVWA

Programming: Python (Flask, SQLite, BeautifulSoup, Requests), JavaScript, Bash, SQL

Web Security: SQL Injection, XSS, Open Redirect, CSRF, Missing Headers, Sensitive File Exposure

Tools: Burp Suite, Nmap, Wireshark, Git, GitHub, Linux, Railway Cloud, SendGrid API

WORK EXPERIENCE

IT Infrastructure Intern | Marengo Asia Hospital — Faridabad, Haryana Mar 2026 – Present

- Supporting hospital IT infrastructure operations including network monitoring and internal system security assessments.
- Assisting with security compliance initiatives for critical healthcare IT infrastructure. Stipend: INR 5,000/month.

Cyber Security Intern | Gurugram Police Cyber Cell — Gurugram, Haryana Jun 2025 – Jul 2025

- Selected for the 12th Gurugram Police Cyber Security Summer Internship Program led by Dr. Rakshit Tandon and officers from the Cyber Crime Detection Unit.
- Led a digital safety awareness project reaching 500+ community members across 3 districts with measurable improvement in online safety knowledge.
- Collaborated with 5 security professionals to analyze cybercrime patterns and produce 3 detailed investigation reports for senior law enforcement.
- Received official appreciation letter from the Assistant Commissioner of Police, Cyber Crime, Gurugram for outstanding results.

PROJECTS

CipherHawk — Web Vulnerability Scanner Mar 2026

Live: cipherhawk-production.up.railway.app | **Code:** github.com/Shivam0087/cipherhawk

- Built and deployed a full-stack web vulnerability scanner from scratch using Python and Flask, currently live and publicly accessible on Railway cloud.
- Detects SQL Injection, XSS (Reflected and Stored), Open Redirect, Missing Security Headers, and Sensitive File Exposure using 100+ payloads and 40+ error signatures.
- Implemented PBKDF2-SHA256 password hashing, email OTP verification, rate limiting, IP banning, session management, and HTTPS with security headers.
- Features include downloadable PDF security reports with fix instructions, admin panel, scan logging, and user dashboard. Stack: Python, Flask, SQLite, JavaScript, HTML, CSS, SendGrid, Git.

EDUCATION

B.Tech, Computer Science — Cyber Security Specialization 2023 – 2027

Sushant University — Gurugram, Haryana

Relevant Coursework: Network Security, Ethical Hacking, Cryptography, Operating Systems, Database Security

Class 12, Science Stream — Suraj School, Sector 75, Gurugram 73% | 2023

Class 10 — Suraj School, Sector 75, Gurugram 70% | 2021

CERTIFICATIONS & RECOGNITION

- Official Appreciation Letter — Assistant Commissioner of Police, Cyber Crime, Gurugram (2025)
- Selected Participant — 12th Gurugram Police Cyber Security Summer Internship Program (2025)
- Google Cybersecurity Professional Certificate — In Progress (Coursera, 2025–2026)
