OBJECTIVE

Motivated B.Tech Cybersecurity student at Sushant University with hands-on internship experience at Gurugram Police Cyber Cell and Marengo Asia Hospital. Seeking opportunities in cybersecurity, ethical hacking, and IT infrastructure to apply academic knowledge to real-world security challenges.

EDUCATION

B.Tech — Computer Science & Engineering (Cybersecurity)	2023 – 2027
Sushant University, Gurugram	Expected CGPA: 6.0 – 6.5
Class XII — PCM	2023
Suraj School, Sector 75, Gurugram	73%
Class X	2021
Suraj School, Sector 75, Gurugram	70%

INTERNSHIP EXPERIENCE

IT Infrastructure Intern	July 2025 – Present
Marengo Asia Hospital, Faridabad	Stipend: Rs. 5,000/month
- Supporting hospital IT operations including network monitoring and system administration. - Assisting in maintaining internal IT infrastructure and improving the security posture of hospital systems.	
Cybersecurity Intern	June – July 2025
Gurugram Police Cyber Cell x Dr. Rakshit Tandon	1 Month
- Worked on a cybersecurity project under the mentorship of Dr. Rakshit Tandon in collaboration with Gurugram Police. - Project was appreciated by ACP Priyanshu Dewan; team received an official appreciation letter from Cyber Cell Gurugram, Sector 43.	

TECHNICAL SKILLS

Languages: Python, Bash, JavaScript, SQL, C

Security Tools: Burp Suite, Nmap, Wireshark, Metasploit, Kali Linux

Domains: Web Application Security, Penetration Testing, Network Security, IT Infrastructure, OSINT

Environment: Linux, Git, Docker, VirtualBox, DVWA

PROJECTS

Web Vulnerability Scanner | Python, BeautifulSoup, Requests, Jinja2
Built a Python CLI tool that crawls websites and automatically detects SQL injection, XSS, and open redirect vulnerabilities. Generates HTML reports with severity ratings.

Network Traffic Analyser | Python, Scapy, Wireshark
Passive network monitoring tool that detects anomalous traffic such as port scans and ARP spoofing attempts, with structured alert logging.

Phishing URL Detector | Python, scikit-learn, Flask
Machine learning classifier trained on UCI phishing dataset to detect phishing URLs. Deployed as a REST API using Flask.

Home Lab Penetration Test | Kali Linux, Metasploit, Nmap
Conducted a full penetration test on a local VirtualBox lab (Kali + Metasploitable2), documenting recon, exploitation, and post-exploitation in a professional report.

ACHIEVEMENTS & CERTIFICATIONS

- Received official appreciation letter from ACP Priyanshu Dewan, Cyber Cell Gurugram (Sector 43) — 2025.
- Currently pursuing Google Cybersecurity Professional Certificate.
- Active participant in CTF competitions on TryHackMe and HackTheBox.
